

DefensX User Guide

Quick intro to the zero-trust

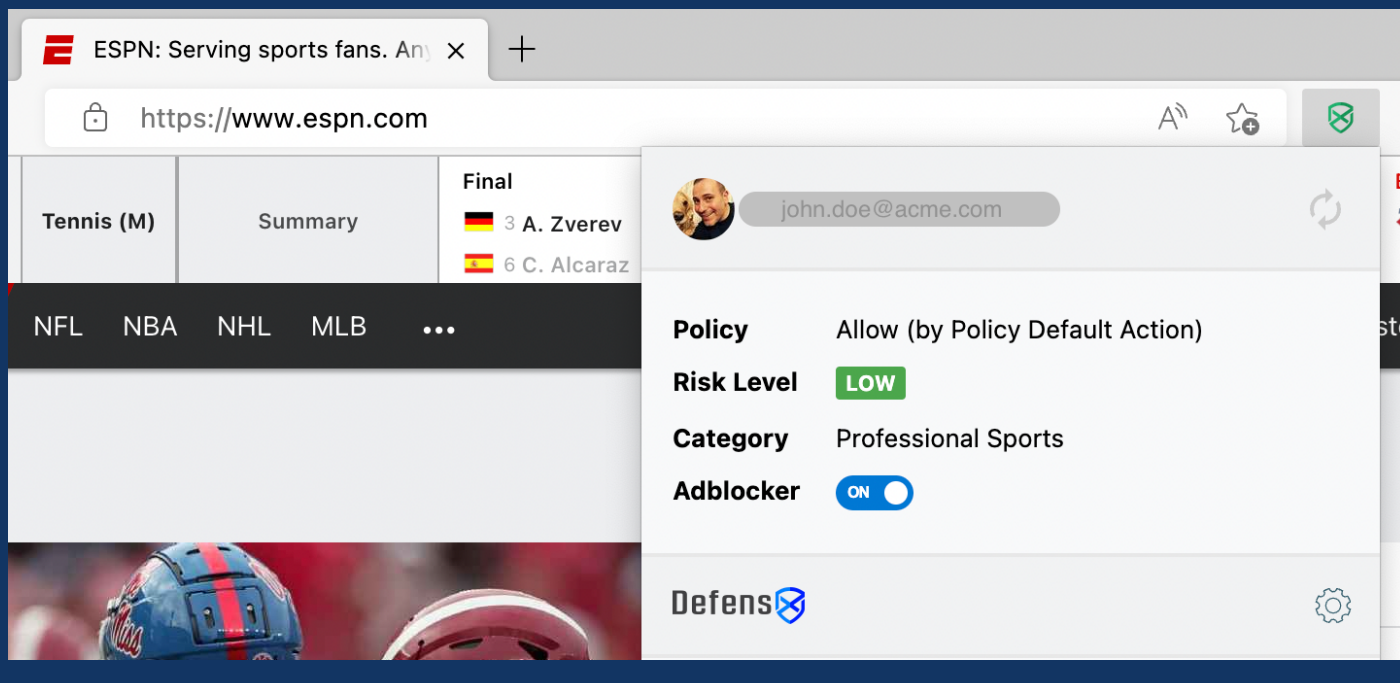

The web browser extension will provide you zero-trust Internet experience.

And the operating system agent will control the application's Internet access.

On any web page, by clicking on the DefensX shield, you can get related security information.

We may apply different security controls to your web sessions based on the risk, your company policies, or sometimes both. The web page might be blocked from visiting or interacting with it, such as clicking on the links, downloading or uploading files, or typing passwords.

Policy	Block (by Risk Level)
Risk Level	HIGH
Category	Illegal Activities
Adblocker	<input checked="" type="checkbox"/>

Policy	Read-only (by Uncategorized URL)
Category	Uncategorized
Adblocker	<input checked="" type="checkbox"/>

In some web pages or for some of the content, we may provide you an option to override our decision. This is going to happen only if you give a consent to proceed.

ReadOnly Protection

This web page is isolated for your security. You can still scroll the webpage, but all other user interactions are disabled.
