

Moovila Perfect Project for ConnectWise PSA

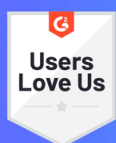

Meet the only AI-powered project and resource management platform fully integrated with ConnectWise PSA.

Work in both platforms simultaneously — with real-time, bi-directional data sync. No duplicate entry, no stale data.

- ✓ Get clear visibility across your portfolio
- ✓ Proactively detect & resolve delays
- ✓ Manage inter-project dependencies
- ✓ Automate critical path management
- ✓ Precisely manage resources & capacity
- ✓ Boost quality & efficiency with smarter templates
- ✓ Inform project resourcing via skills & certifications
- ✓ Improve customer communication & accountability

The Leading AI Project Management Platform

Deliver every project on time, without the manual work.

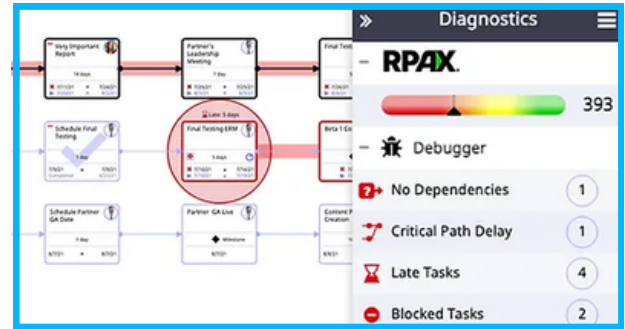

Perfect Project gives MSPs a certified, bi-directional integration with ConnectWise PSA, bringing AI-driven automation, real-time risk detection, and full resource visibility to every project you run.

Easy to build, easy to manage

Build structurally sound projects in with intelligent templates that improve over time.

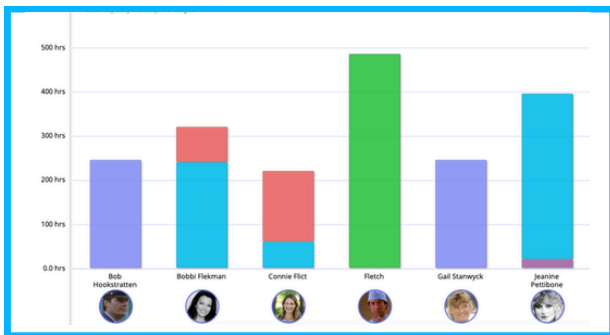

- Manage dependencies across tasks and projects
- Automate critical path and back-scheduling
- Gantt, Kanban, list, and critical path views
- One-click timeline updates across all tickets

24/7 project timeline monitoring

RPAX works around the clock catching risks before they become missed deadlines (no manual check-ins required).

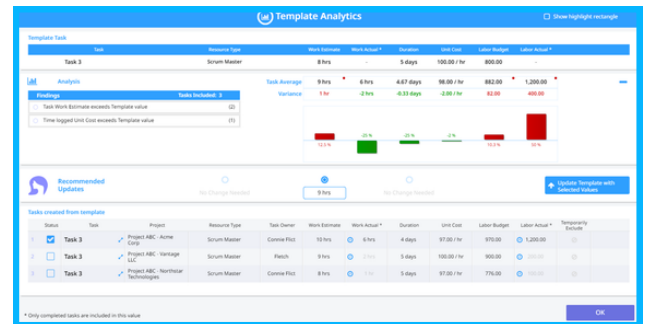

- Auto-detect blocked tasks and delays
- Project health scoring predicts on-time delivery
- AI coaching guides any team to resolve issues
- Proactive alerts help prevent problems

Scheduling and capacity forecasting

Know the exact number of resources required to consistently deliver on time and on budget.

- Real-time portfolio-wide resource visibility
- Instantly spot and resolve scheduling conflicts
- Assign work by skill, role, and live availability
- Model future capacity before taking on new work

Easy time tracking and invoicing

Keep projects running smoothly and on budget to bill more accurately and easily.

- Pre-built templates for onboarding, migrations, installs, and more
- Compare estimates vs. actuals with template analytics
- Update templates in one click based on real outcomes
- Standardize execution across your entire team

Elevate your MSP with superior project & resource management.
