

NordLayer

A future-forward, adaptive network access security solution

It's a part of the most trusted cybersecurity brand Nord Security and brought by the engineers of NordVPN.

Easy to start—combine—scale solution is based on the industry's most advanced ZTNA and cloud-edge security practices.

NordLayer is most suitable for

Remote & hybrid work setups

Fast scaling enterprises with cloud resources

B2B end-users of small & mid-size businesses (<500 but not limited to)

IT, Finance, Engineering & Manufacturing, Marketing, Healthcare, Consulting services

Make your customers's day-to-day business operations secure for

Network & resource access management

- Segment access to company resources
- Control access to selected content categories and specific apps
- Establish a connection in between remote devices
- Remotely access hybrid resources

Internet access security

- Protect traveling employees & secure access through public Wi-Fi
- Prevent threats while browsing the internet
- Access geo-specific content
- Ensure IP address masking

Compliance management

- Monitor VPN activity in your organization
- Overview devices in the network
- Manage identity & access for users and apps
- Encrypt data transmissions from untrusted networks

Our Partners' testimonials

Mark Rowland, Co-Founder & Managing Director at Cutec

"The solution setup was fantastic as we looked at a massive project and a big headache. Rolling out NordLayer VPN connection to 300 people was achieved in four days."

Dean Mechlowitz, Co-founder & Technology Operations at TEKRISQ

"None of our clients wish to learn or do anything in terms of managing a solution—all they really want to do is be protected. Besides just turning off and on, that's as far as they want to go, so NordLayer has to be a solution that we can fully manage."

Christopher Capps, Chief Information Security Officer at Sequentur

"So I think the biggest comment again is going to be on the simplicity, I think being some of IT administrators that we work with are expecting an endpoint VPN solution to be difficult, and when we get in and there's really nothing to it, they are pleasantly surprised."
