Staff behavior dictates a large percentage of the organization's success

- Labor costs can be up to 70% of total business expenses
- Revenue is directly correlated to staff productivity (sales, marketing, IT, finance, HR)
- Productive activity can be different for each team. Businesses are looking to make data-driven staff decisions

Stay ahead of Key Performance Indicators with Productivity Metrics

- Company-wide productivity score, broken down by team(s), and user(s)
- Productivity trends over time (daily, weekly, monthly)
- Al-driven productivity segmentation
- Activity metrics for users, teams, websites, and apps

See what matters to you: Automated reporting with high-level and granular productivity insights
